## RoHS2 Compliance

Based on information generated by ourselves and also provided by our suppliers, HANYOUNG NUX (PT. Hanyoung Electronic Indonesia Co., Ltd.) can confirm that TERMINAL BLOCK Switch Series products are RoHS 2 compliant

### RoHS2 Compliance Statement

This statement certifies that TERMINAL BLOCK Series products supplied by HANYOUNG NUX are fully RoHS compliant in accordance with EU RoHS Directive 2015/863/EU and the Council of 8 June 2011 on the restriction of the use of certain hazardous substances in electrical and electronic equipment (RoHS Directives). We hereby declare the following materials or substances are not contained therein (the material/substance is not found above the threshold level listed other than exemptions approved by RoHS). The restricted substances and their limits per the RoHS Directive 2015/863/EU Article 4, Annex II dated 4 June 2015 are as listed below :

1. Lead (Pb)	6. Polybrominated Diphenyl Ether (PBDEs)
2. Mercury (Hg)	7. Di-(2-Ethylhexyl) phthalate (DEHP)
3. Cadmium (Cd)	8. Benzyl butyl phthalate (BBP)
4. Hexavalent Chromium (Cr6+)	9. Di-butyl phthalate (DBP)
5. Polybrominated Biphenyls (PBBs)	10. Di-isobutyl phthalate (DIBP)

The maximum permitted concentrations are 0.1% or 1000 ppm (except for cadmium, which is limited to 0.01% or 100 ppm) by weight of homogeneous material. This means that the limits do not apply to the weight of the finished product, or even to a component, but to any single substance that could (theoretically) be separated mechanically—for example, the sheath on a cable or the tinning on a component lead.
