Uncertainty K	3 dB (A)
A-weighted sound power level	89.7 dB (A)
Uncertainty K	3 dB (A)

Always wear ear protectors.

Vibration information

Total vibration values (vector sum in the three axes) determined according to EN 62841

Vibration emission value a_h (front handle)	4.56 m/s ²
Uncertainty K	1.5 m/s ²
Vibration emission value a_h (rear handle)	2.62 m/s ²
Uncertainty K	1.5 m/s ²

WARNING!

The declared vibration total values and the declared noise emission values given in this instruction manual have been measured in accordance with a standardised test and may be used to compare one tool with another. They may be used for a preliminary assessment of exposure.

The declared vibration and noise emission values represent the main applications of the tool. However, if the tool is used for different applications, used with different accessories, or poorly maintained, the vibration and noise emission may differ. These conditions may significantly increase the exposure levels over the total working period.

An estimation of the level of exposure to vibration and noise should take into account the times when the tool is turned off or when it is running idle. These conditions may significantly reduce the exposure level over the total working period.

Identify additional safety measures to protect the operator from the effects of vibration and noise, such as maintaining the tool and the accessories, keeping the hands warm (in case of vibration), and organising work patterns.

 **WARNING! Read all safety warnings, instructions, illustrations, and specifications provided with this product.** Failure to follow all instructions listed below may result in electric shock, fire, and/or serious injury.

Save all warnings and instructions for future reference.

GRASS TRIMMER SAFETY WARNINGS

Do not use the product in bad weather conditions, especially when there is a risk of lightning. This decreases the risk of being struck by lightning.

Thoroughly inspect the area for wildlife where the product is to be used. Wildlife may be injured by the product during operation.

Thoroughly inspect the area where the product is to be used and remove all stones, sticks, wires, bones, and other foreign objects. Thrown objects can cause personal injury.

Before using the product, always visually inspect to see that the cutter or blade and the cutter or blade assembly are not damaged. Damaged parts increase the risk of injury.

Follow instructions for changing accessories. Improperly tightened blade securing nuts or bolts may either damage the blade or result in it becoming detached.

Wear eye, ear, head, and hand protection. Adequate protective equipment will reduce personal injury by flying debris or accidental contact with the cutting line or blade.

While operating the product, always wear non-slip and
