

HEAD PROTECTION

SAFETY HELMET

Industrial safety helmets by PROGUARD® have a unique combination of safety, comfort, styling features, and provide excellent head protection that conform to Malaysia SIRIM standard. PROGUARD® safety helmets are fitted with energy absorber anchorage system which considerably enhances the shock absorption effectiveness of the safety helmet. Moreover, the Slide-Lock adjustment system enables the internal harness to be adjusted while the safety helmet is being worn. Like most PROGUARD® PPE products, our attention is given to our users' safety and convenience.

Other PPE accessories have been designed to be fitted to PROGUARD® safety helmets without compromising their effectiveness, including ear muffs and face shields.

Our safety helmets come in vented and unvented models and with a range of colours which can distinguish different worker classifications on site.

Standard Compliances

PROGUARD® helmets carry SIRIM standard certification, which confirm that the helmets have been tested for shock absorption, penetration, stiffness, flammability test, and chin strap anchorage test.

EN 397, AS/NZS 1801 Type 1 & MS 183 : Safety Helmet EN812 : Bump Caps

Directive and carry the following information by way of proof:

- ▶ SIRIM, EN, & CE Mark.
- ▶ Standard Number.
- ▶ Date, year & month of manufacturing.
- ▶ Material.

We provide a user instruction leaflet on every helmet for better explanation about usage, cleaning, shelf life, and storage purpose.

Do not interchange suspensions, harnesses, or shells from different manufacturers because they might not have been tested to ensure compliance with the standards and would likely void certification.

Shell Life

All PROGUARD® safety helmets are marked with month and year of manufacturing. If the helmets are stored in boxes which they are supplied with and not experience any environmental stress, the shelf life is not limited. However, it is not recommended that a helmet should be in use after 5 years from date of manufacturing.

Material

ABS - Performs well in tropical climate temperatures. Offers good impact abrasion and chemical resistance. Also a good electrical insulator.

Accessories

All of PROGUARD® helmets are equipped with a sweatband and chin strap. Either can be purchased separately.

Standard : MS 183:2001 & EN397:2012 + A1: 2012.

Result : The chin strap anchorage shall release between force 150N-250N.

PROGUARD® safety helmets can be fitted with a wide range of PROGUARD® visors or hearing protections.

Look after your headgear and it will look after you

- ▶ Keep your helmet clean with a soft cloth, mild soap, and water.
- ▶ Store out of direct sunlight, between 5 - 25°C.
- ▶ Inspect it regularly. Anything more than a superficial scrape or abrasion, replace it.
- ▶ Please dispose immediately & replace the helmet after it has withstood impact or penetration.
- ▶ Replace helmet suspension after not more than 12 months of usage.
- ▶ Keep away from abrasive chemicals, solvents, and self-adhesive labels.

SAFETY HELMET *Advantage® I*

The ADVANTAGE 1 shell is built with an 8 point moulded shock absorbing system. It is lightweight and well balanced, ensuring user's comfort, stability, and performance. It is also equipped with a unique locking system and can be fitted with various PROGUARD® harnesses and locking systems. The shell can also be fitted with various PROGUARD® accessories through the lateral slots at the side for different usages and needs of the various industries and applications.

The design has gain tremendous popularity both locally and internationally for its modern striking design and was awarded the prestigious Malaysia Good Design Award by Malaysian Design Council.

Advantage® I

ACCESSORIES HELMET VISOR HOLDER

Elegant visor holder that eliminates face and forehead injuries. Designed with rounded shape side tension knobs that allow flip-up visor to be positioned as per user wishes.

Faceshield Browguard Holder

Model:
VH4-CE

Type : Durable & ideal choice for excellent face protection.
Adaptability : Lightweight & comfortable with adjustable knobs for height adjustment. Ratchet Locking system.
Visor : FC48 & SV 1 Series visor's.
Material : HDPE.

Packaging : 1 pc/polybag, 10 pcs/box
* Visor sold separately

Economic Visor Holder

Model:
EVH-1 BLK

Type : Durable & ideal choice for excellent face protection.
Adaptability : Lightweight & comfortable with adjustable knobs for height adjustment. Ratchet Locking system.
Visor : FC48 & SV 1 Series visor's.
Material : HDPE.

Packaging : 1 pc/polybag, 10 pcs/box

Helmet lateral slot on the side contours can be attached with accessories. Multiple slots are available for all PROGUARD® helmet models.

Carrier With Spherical Clear Visor

Model:
BGVH/SI-1

Carrier With Cylinder Clear Visor

Model:
BGVH/SI-2

Helmet Visor Carrier

Model:
BGVH

Offers both safety and durability. Lightweight and comfortable to wear all day long. Safe, practical, & economical visor fitting ensures extra protection against liquid or hot solid metal. Replacement visor is available in polycarbonate.

Packaging: 1 pc/polybag, 10 pcs/box

- Safety helmet sold separately.
- Fits perfectly well on PROGUARD® helmets and visors or other compatible safety helmets.

PROGUARD® won't be responsible if the product does not fit with other brands in the market.

FACE & HEARING PROTECTION COMBINATION KIT

24

Multisystem combination kit, designed with a simple slide & lock system for easy installation and detachment. Suitable for different applications & environments.

CE EN166 EN352-1

NEW

Radiant Guardian

Model: RG-41P

Designed to provide optimum face & hearing protection with emphasis on user comfort and usage.

- Durable and ideal choice for excellent face protection.
- Lightweight and comfortable to wear all day long.
- Extra wide ear cushions for best comfort.
- Soft padded headband with low force.
- Clear visor fitting ensures extra protection against liquid & hot solid metal.
- Suitable for electrical hazard environment, liquid handling, and loud operating machinery.
- Certified to EN 166, ANSI Z87:1 & EN 352-1.

Packaging: 1 pc/polybag, 10 pcs/box

CE EN166 EN352-1

NEW

Forest Sentinel

Model: FS-4MP

Combination of a multisystem forestry kit which consists of mesh visor, carrier, and earmuff.

- Durable and ideal choice for excellent face protection.
- Lightweight and comfortable to wear all day long.
- Extra wide ear cushions for best comfort.
- Soft padded headband with low force.
- Mesh visor ideal for forestry and gardening works. Helps to block hazards such as flying wood chips & splinters.
- Ideal usage for environment with debris and loud operating machinery.
- Certified to EN 166 & EN 352-1.

Packaging: 1 pc/polybag, 10 pcs/box

ACCESSORIES VISOR

Classic polycarbonate visor which provides excellent protection against impacts, flying particles, liquid splashes, molten metals, and hot solids.

Replacement Cylinder Visor

Model:
FC48C-CE

- Application : Suitable for most application in electrical hazard environment.
- Features : Shaded with anti-glare, brazing & light cutting operation purpose.
- Accessories available : A2, A3, A4, VH4-CE, EVH-1 & BGVH.
- Standard : Comply with EN166-1 B & ANSI Z87.1.
- Material : Polycarbonate.

Packaging : 1 pc/polybag, 50 pcs/box

Replacement Cylinder Visor

Model:
FC48G5-CE

- Application : Suitable for most application in electrical hazard environment.
- Features : Shaded with anti-glare, brazing & light cutting operation purpose.
- Accessories available : A2, A3, A4, VH4-CE, EVH-1 & BGVH.
- Standard : Comply with EN166-1 B & ANSI Z87.1.
- Material : Polycarbonate.

Packaging : 1 pc/polybag, 50 pcs/box

Replacement Spherical Visor

Model:
SVI-S5-CE

- Application : Anti-Fog coating visor suitable for most application in electrical hazard environment.
- Features : Shaded with anti-glare, brazing & light cutting operation purpose.
- Accessories available : A2, A3, A4, VH4-CE & BGVH.
- Material : Polycarbonate.

Packaging : 1 pc/polybag, 50 pcs/box

Replacement Spherical Visor

Model:
SVI-1-CE

- Application : Suitable for most application in electrical hazard environment.
- Features : Shaded with anti-glare, brazing & light cutting operation purpose.
- Accessories available : A2, A3, A4, VH4-CE & BGVH.
- Standard : Comply with EN166-1 B & ANSI Z87.1.
- Material : Polycarbonate.

Packaging : 1 pc/polybag, 50 pcs/box

Economic Replacement Visor

Model:
FC48C-AL

- Application : Suitable for most application not in electrical hazard environment.
- Features : 1.0 mm Polycarbonate visor with aluminium bound.
- Accessories available : A2, A3, A4, VH4-CE, EVH-1 & BGVH.
- Material : Polycarbonate & Aluminium.

Packaging : 1 pc/polybag, 35 pcs/box, 140 pcs/carton.

Replacement Mesh Visor

Model:
FC48SM

- Application : Ideal for forestry and gardening works. Helps block hazards such as flying wood chips & splinters.
- Features : Fitted with ratchet adjustment headgear to fit various head sizes.
- Accessories available : A2, A3, A4, VH4-CE, EVH-1 & BGVH.
- Standard : Comply with EN166-1 B.
- Material : Steel.

Packaging : 1 pc/polybag, 50 pcs/box
